

Apply It - Labs

Observation and Question

What do you already know about the subject you're testing? What question are you trying to answer in your experiment?

Hypothesis

What do you think the answer to your question will be?

Experiment

Write the steps for your experiment. This is like a recipe that other scientists can follow to see what you completed.

Data and Analysis

Record your findings with sketches and/or notes.

Conclusion

What did you learn? Was your hypothesis correct?
